

Dinosaur Day Camp
Fremont/Silicon Valley
Home of Christ Chinese Church
June 14- 21, 2019

Noah's Flood Changes the Earth's Geology.

**18 The waters prevailed and greatly increased on the earth,
and the Ark moved about on the surface of the waters.**

Amy and Russ teach how Noah's Flood effected the geology of the world in the rocks and strata we see today.

Apatosaurus Vertebra 4 foot long on left. Three foot long Trilobite on right.

With the Fox Bat you can see the larger blood vessels visible against the light.

Three foot long Mosasaur skull on right.

Dinosaur eggs of various species.

ADVENTURE SAFARIS

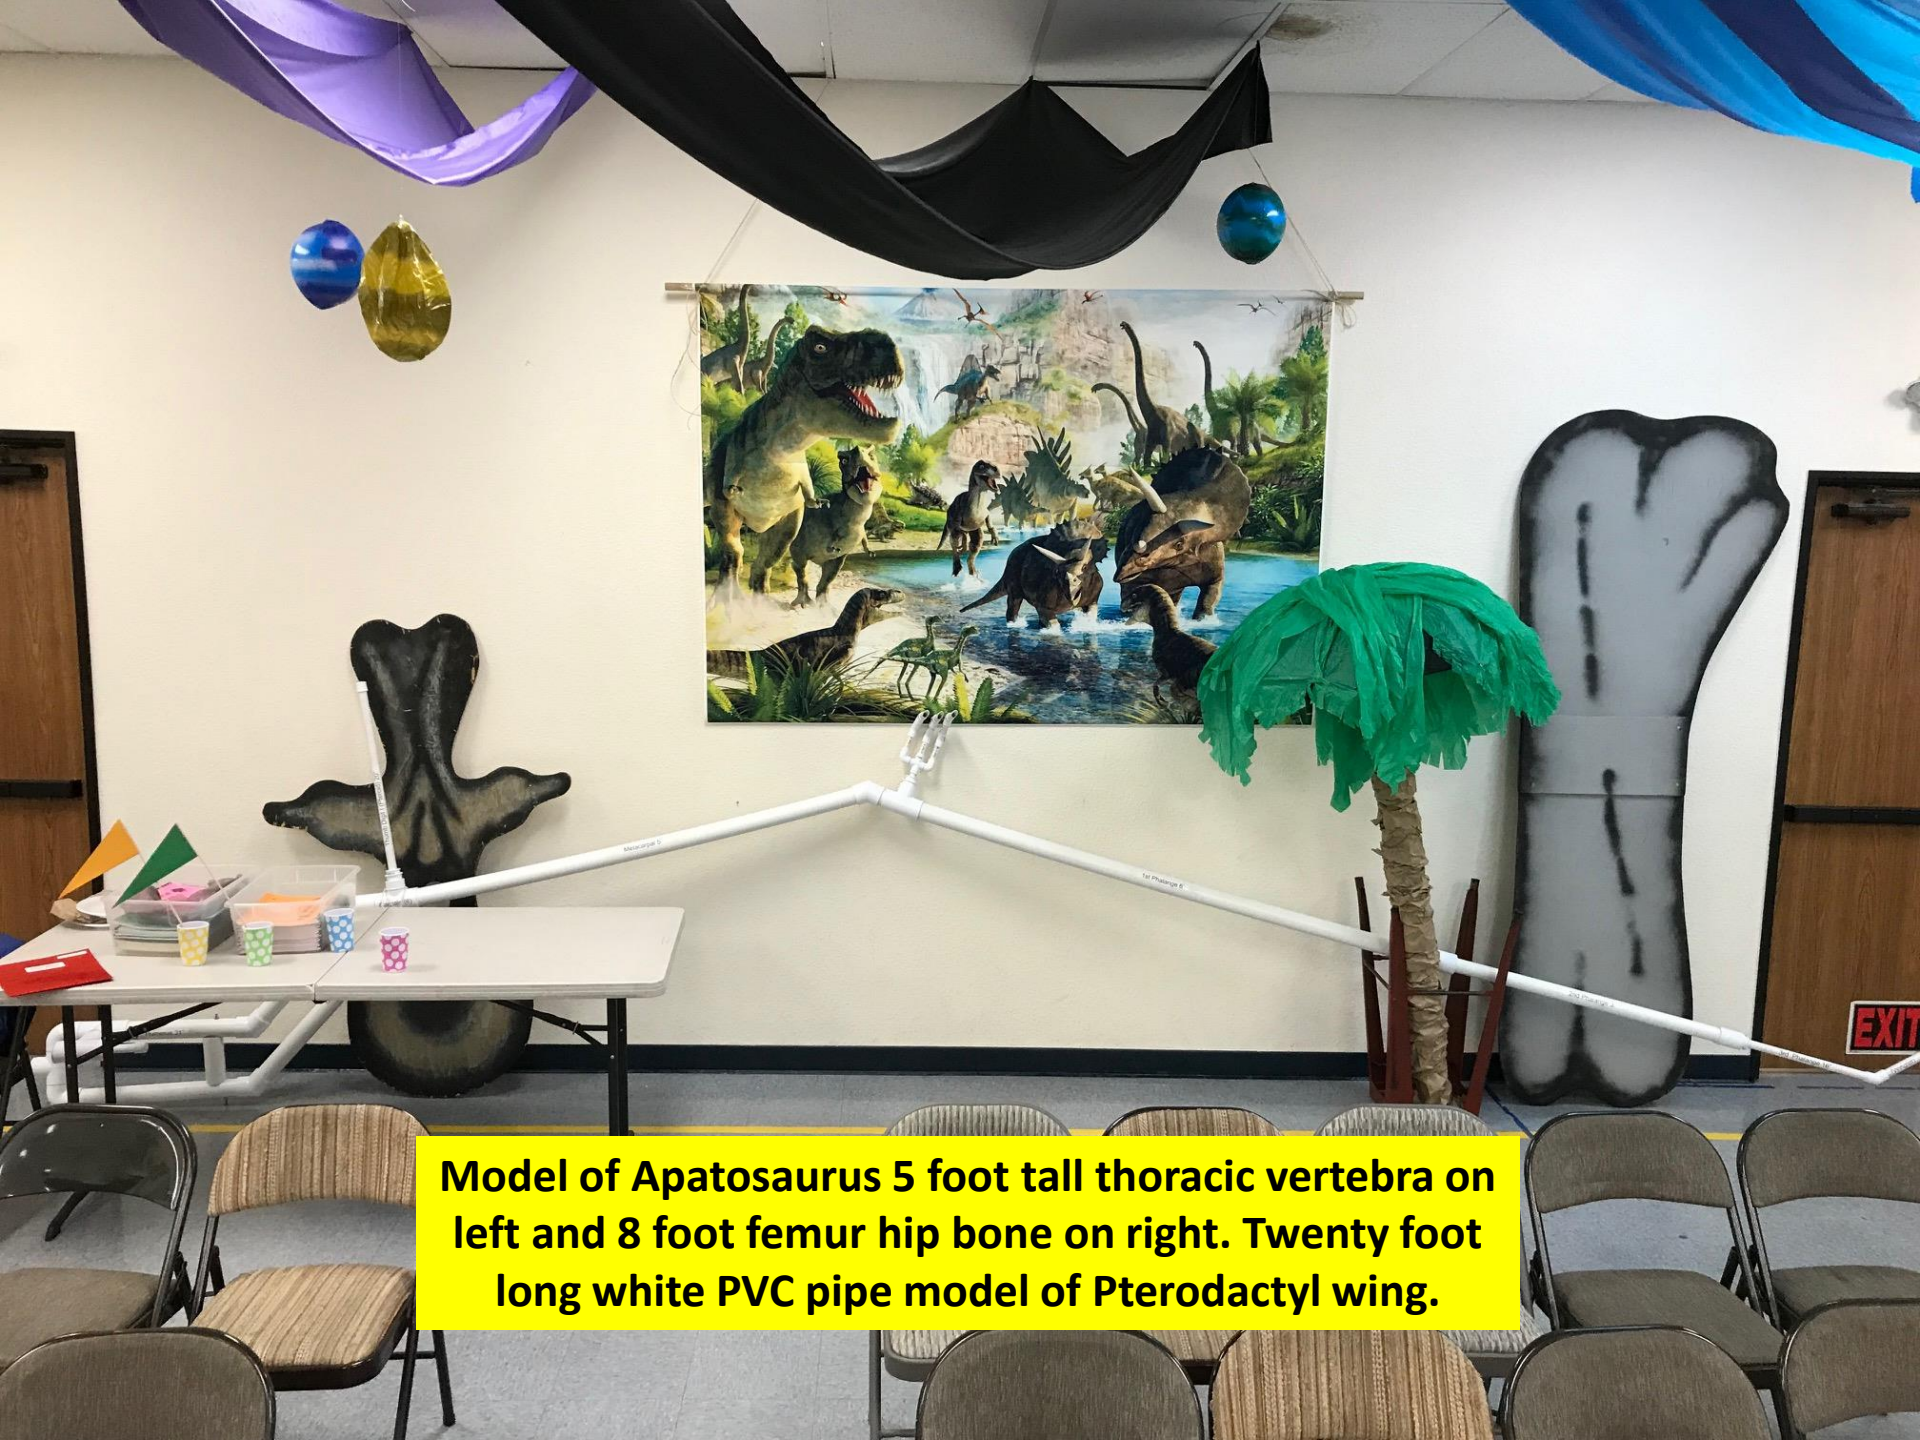

**Duck Billed Dinosaur
Vertebrae, leg and tail bones.**

Triped Chinese Dragon model as described by Marco Polo in 1271 AD.

Model of Apatosaurus 5 foot tall thoracic vertebra on left and 8 foot femur hip bone on right. Twenty foot long white PVC pipe model of Pterodactyl wing.

3.Name the Rocks in Box & Ocean Flood Strata work sheet.

Guessing Game to name the ocean animals and rock types box.

1. Trilobite paint

NEED

Paints

Brushes

Water bowls

Newspaper to work on

Names on Trilobite

Area for pick up after class

There are no fossils that show what color they were. Kids just use their imagination.

**I love painting
my Trilobite**

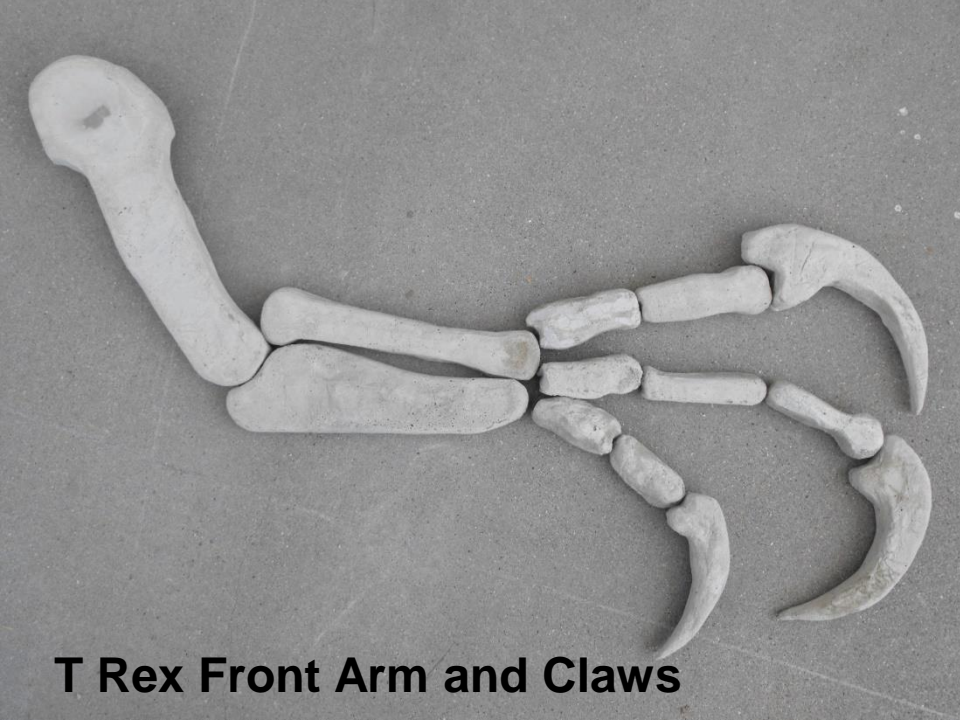

Fossil exhibit.

2. Dinosaur dig

Way cool!

T Rex Front Arm and Claws

T Rex lower jaw bone

Intrusive artifact is when someone digs a hole into a strata that has old dinosaur bones and buries a new object. There will be a few of these in the dig.

The previous page will help the leader to tell what the kids what the artifact is that they are digging up.

T Rex Front Claws

What they will find in the “dig.”

**Apatosaurus
finger bone**

Apatosaurus Claw

**Duck Billed
Hadrosaurus Egg
Baby Inside**

**T Rex Egg
Baby Inside**

Trilobite

T Rex Tooth

**Duck Bill
Tail Bone**

Clam

**Mastodon
Molar tooth**

Oyster

T Rex Teeth

**Neck
Vertebrae**

**One Half
Pelvis Bone**

**Ancient Man
Face**

**Megalodon
Shark Tooth**

**Duck Billed
Hadrosaurus
Ischium – Holds
up the tail**

**Femur Hip
Bone**

Tibia

**Humerus
Arm Bone**

**Cow Bones but
Similar to Dinosaur
Bones only smaller**

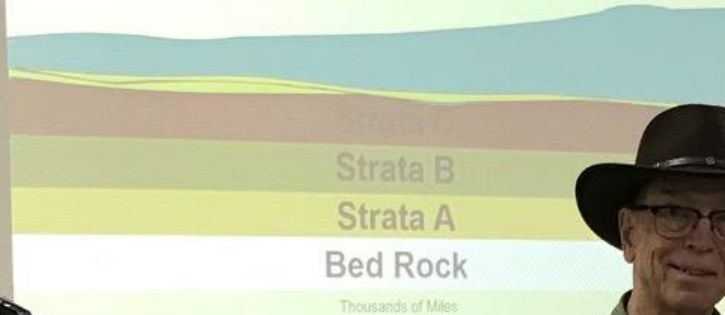

Rib

**Frying Pan
Intrusive
burial**

**Fossilized
Caterpillar**

This would happen every day for 150 days
and would create strata layers over 3 miles
deep in some places...

**Discovering how sandstone layers with
Play Doh, called strata, were formed by
Noah's Flood.**

Give me 5!

**Dinosaur
Camp is
great fun!**

8. Activity

Stream Flood Table, Flood Tube

Demo of Noah's Flood

Need hose and spray nozzle. Two saw horses or table to set it on.

**Bring on
the kids!**

Way cool
times 2!

Kids loved to play in the mud from
Noah's Flood demonstration.

Students place houses, cars, animals and dinosaurs to see what happens when the Flood waves hit them.

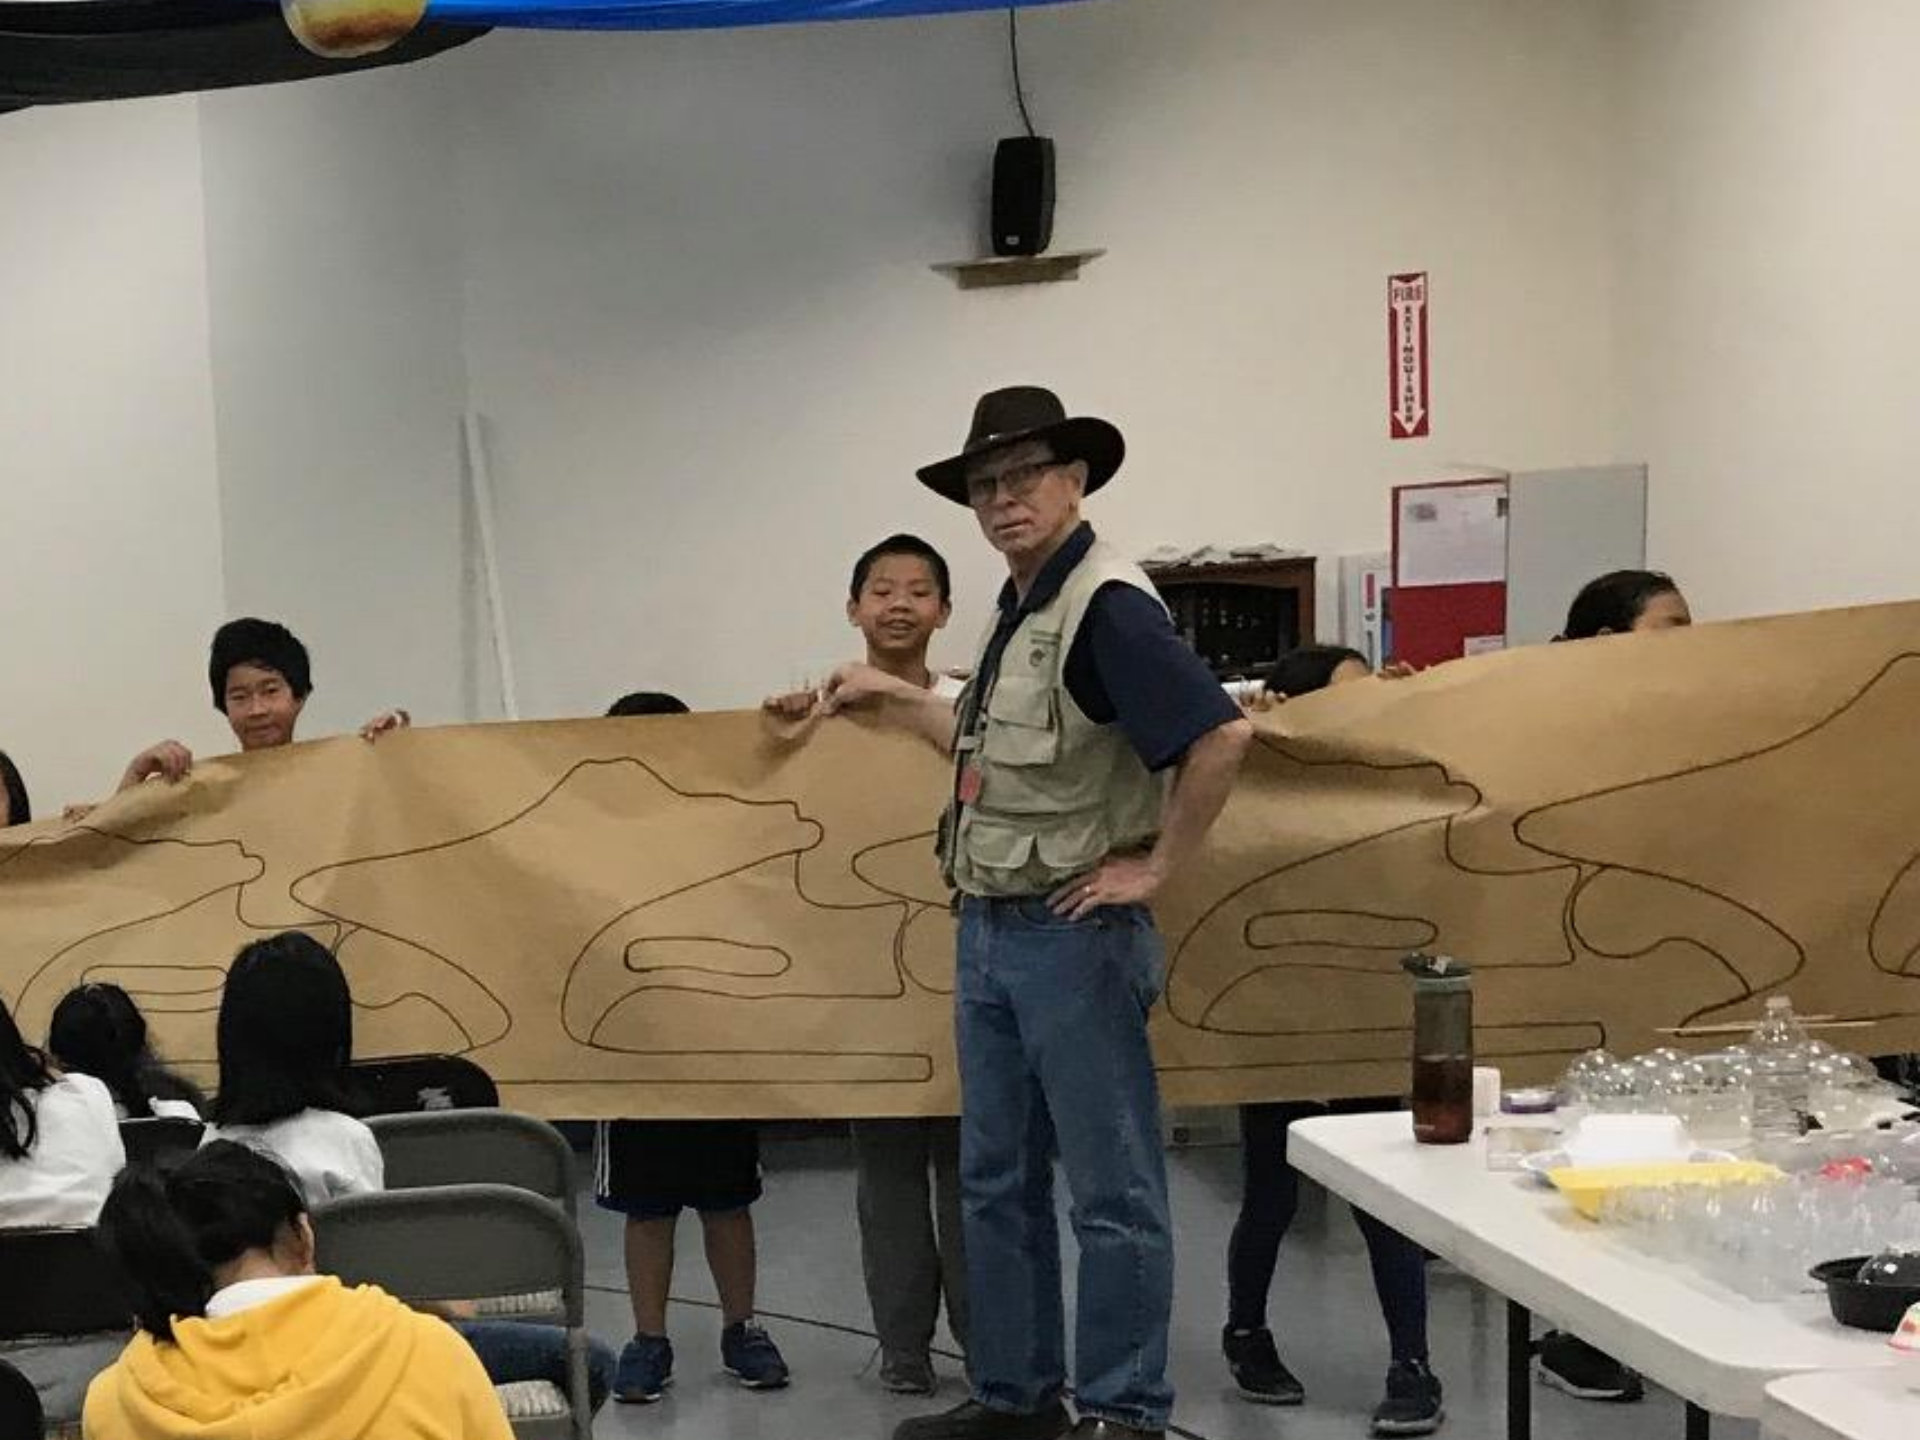

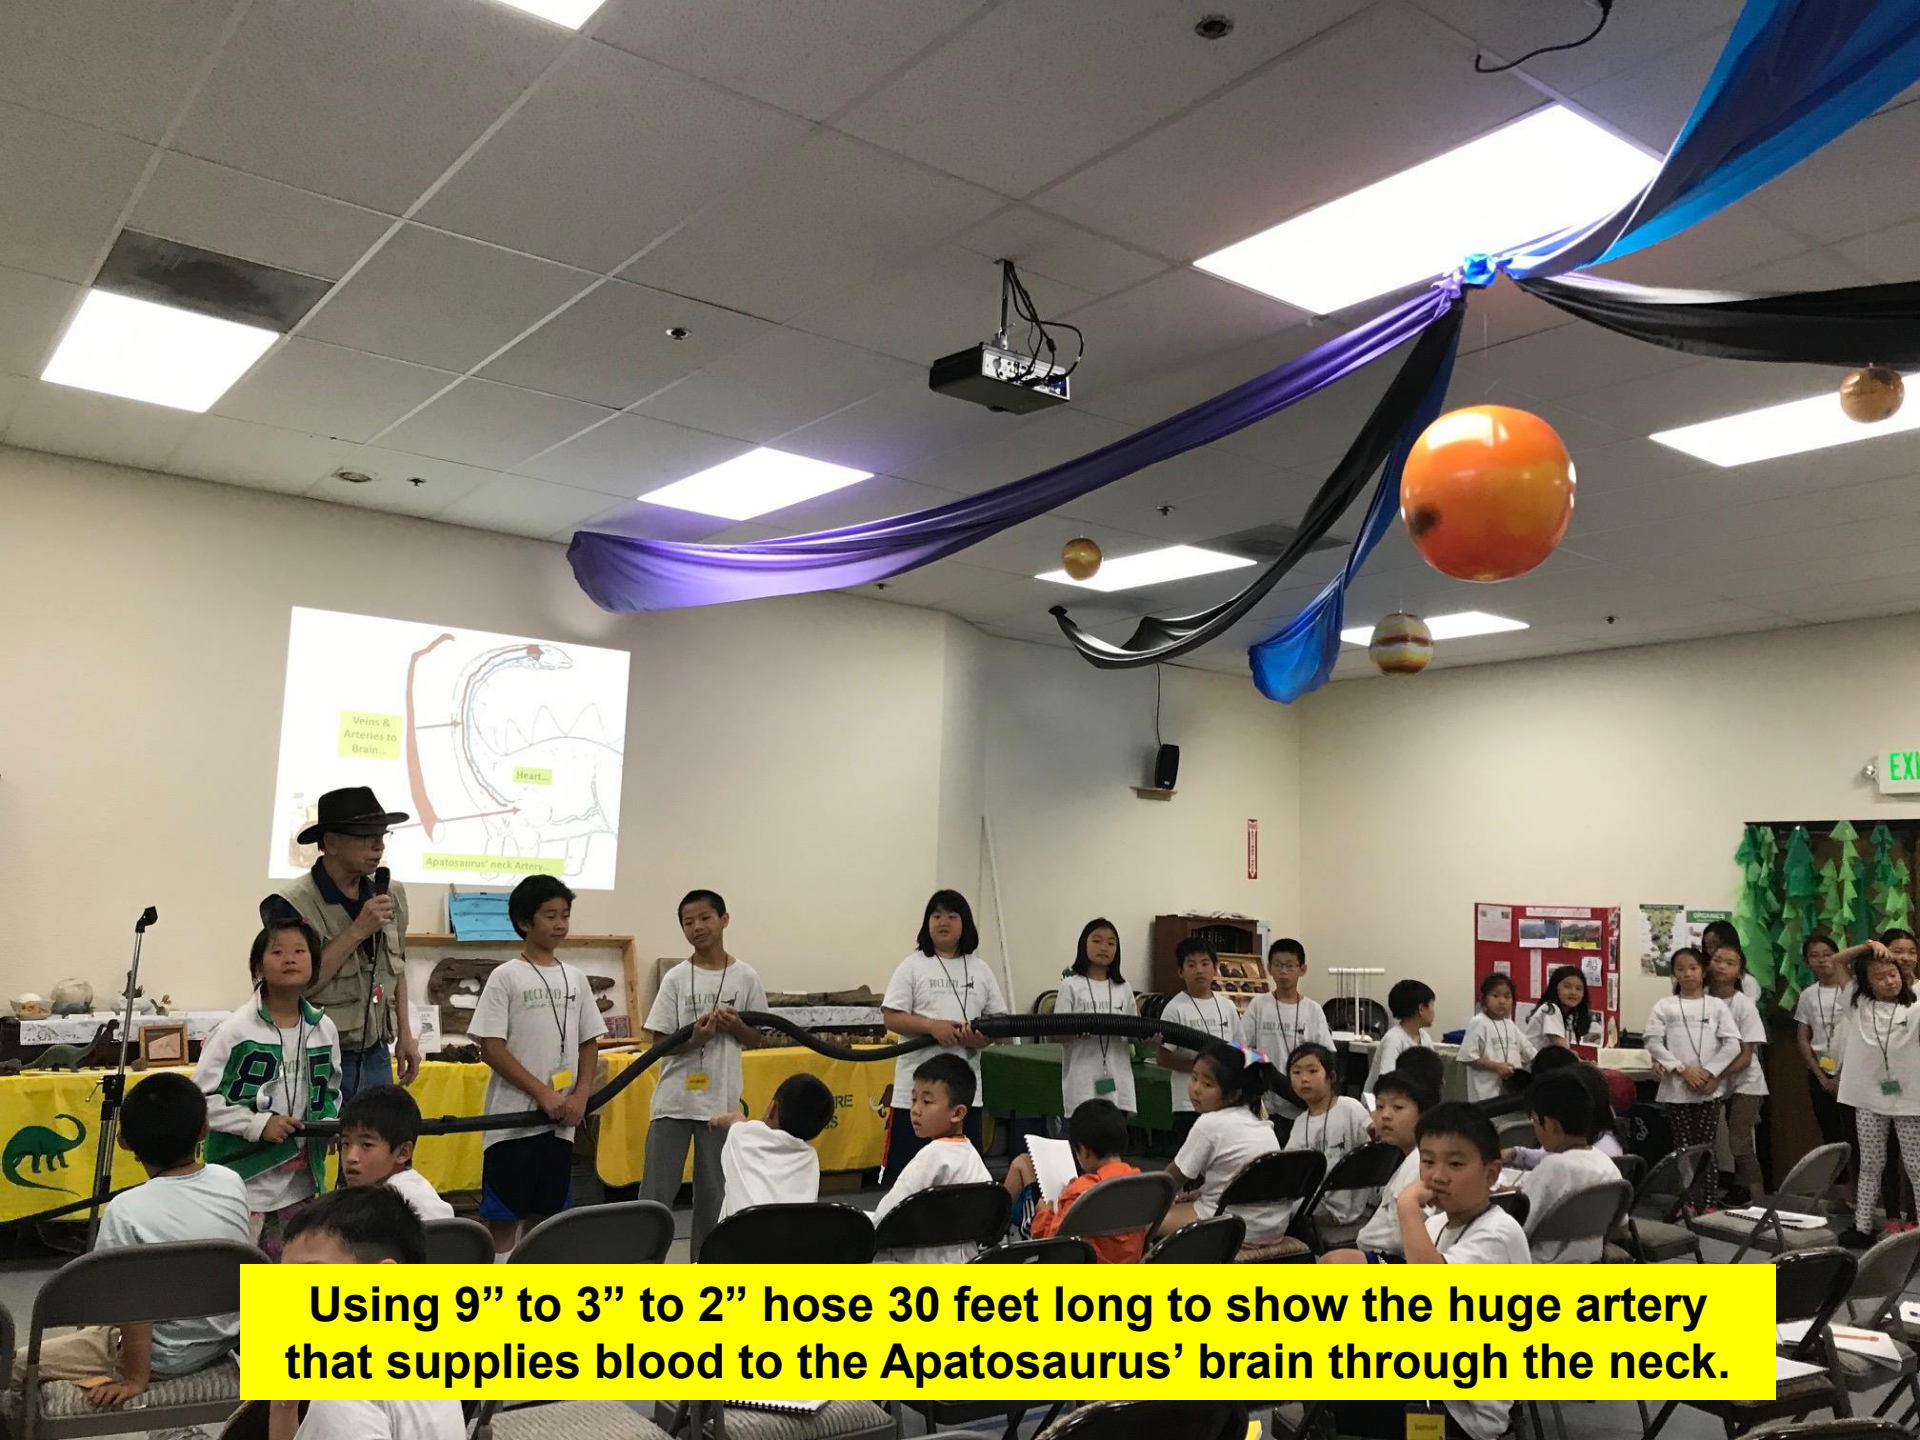

We rolled out a full sized drawing of the 40 foot neck of an Apatosaurus found in South America that was 130 feet long.

Now that is
BIG!!

Using 9" to 3" to 2" hose 30 feet long to show the huge artery that supplies blood to the Apatosaurus' brain through the neck.

Model of Apatosaurus 5 foot tall thoracic vertebra on left and 8 foot femur hip bone on right.

Way cool!

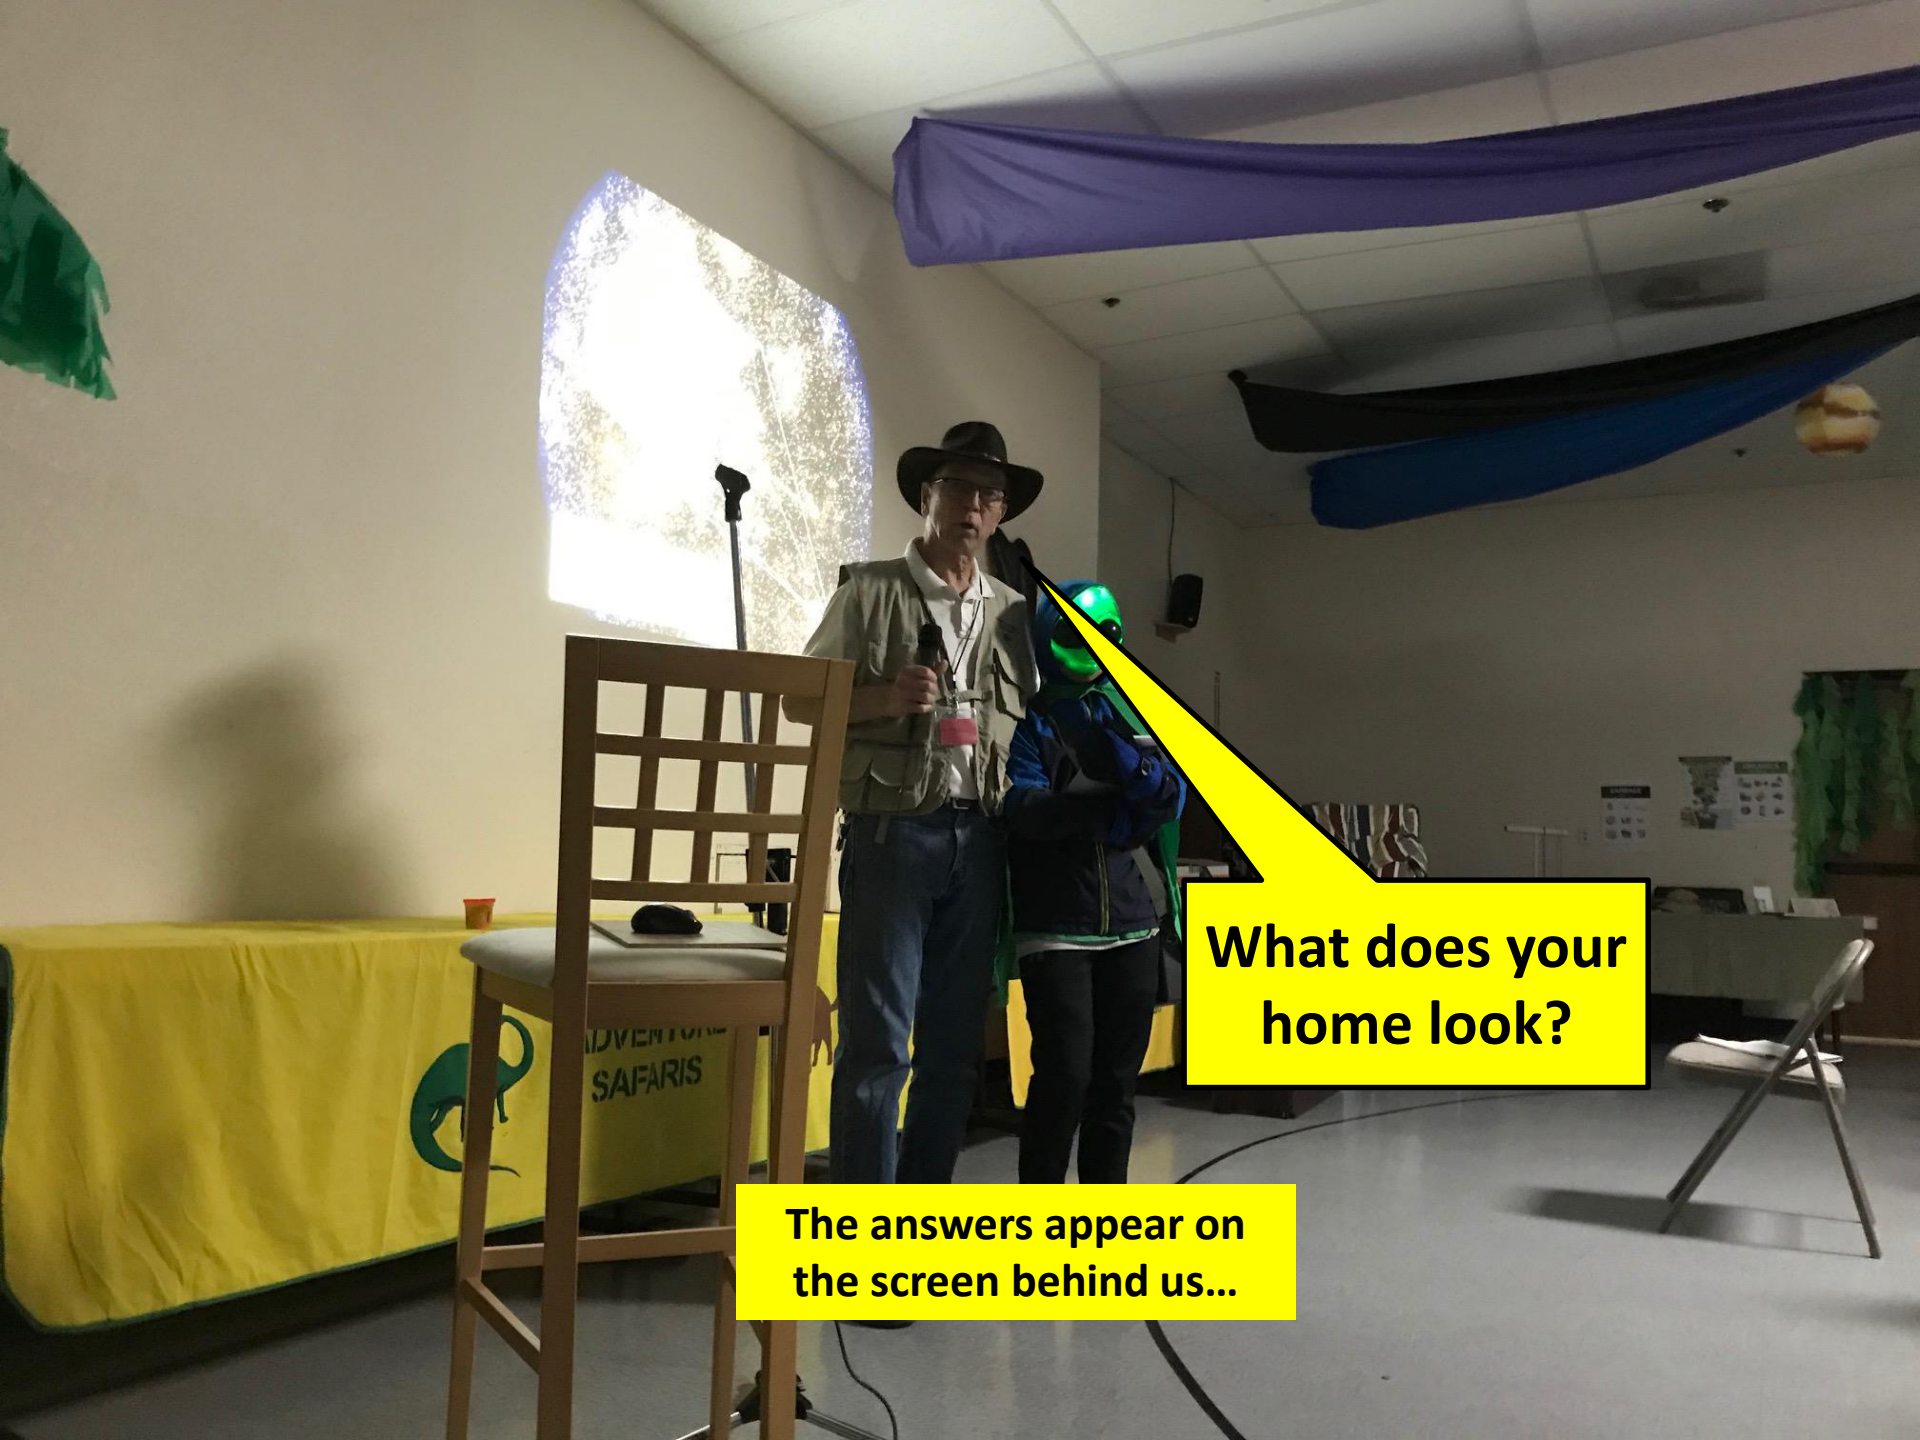

Questions to ask the Little Green Man

**We have successfully made contact
with a little green man from Mars.**

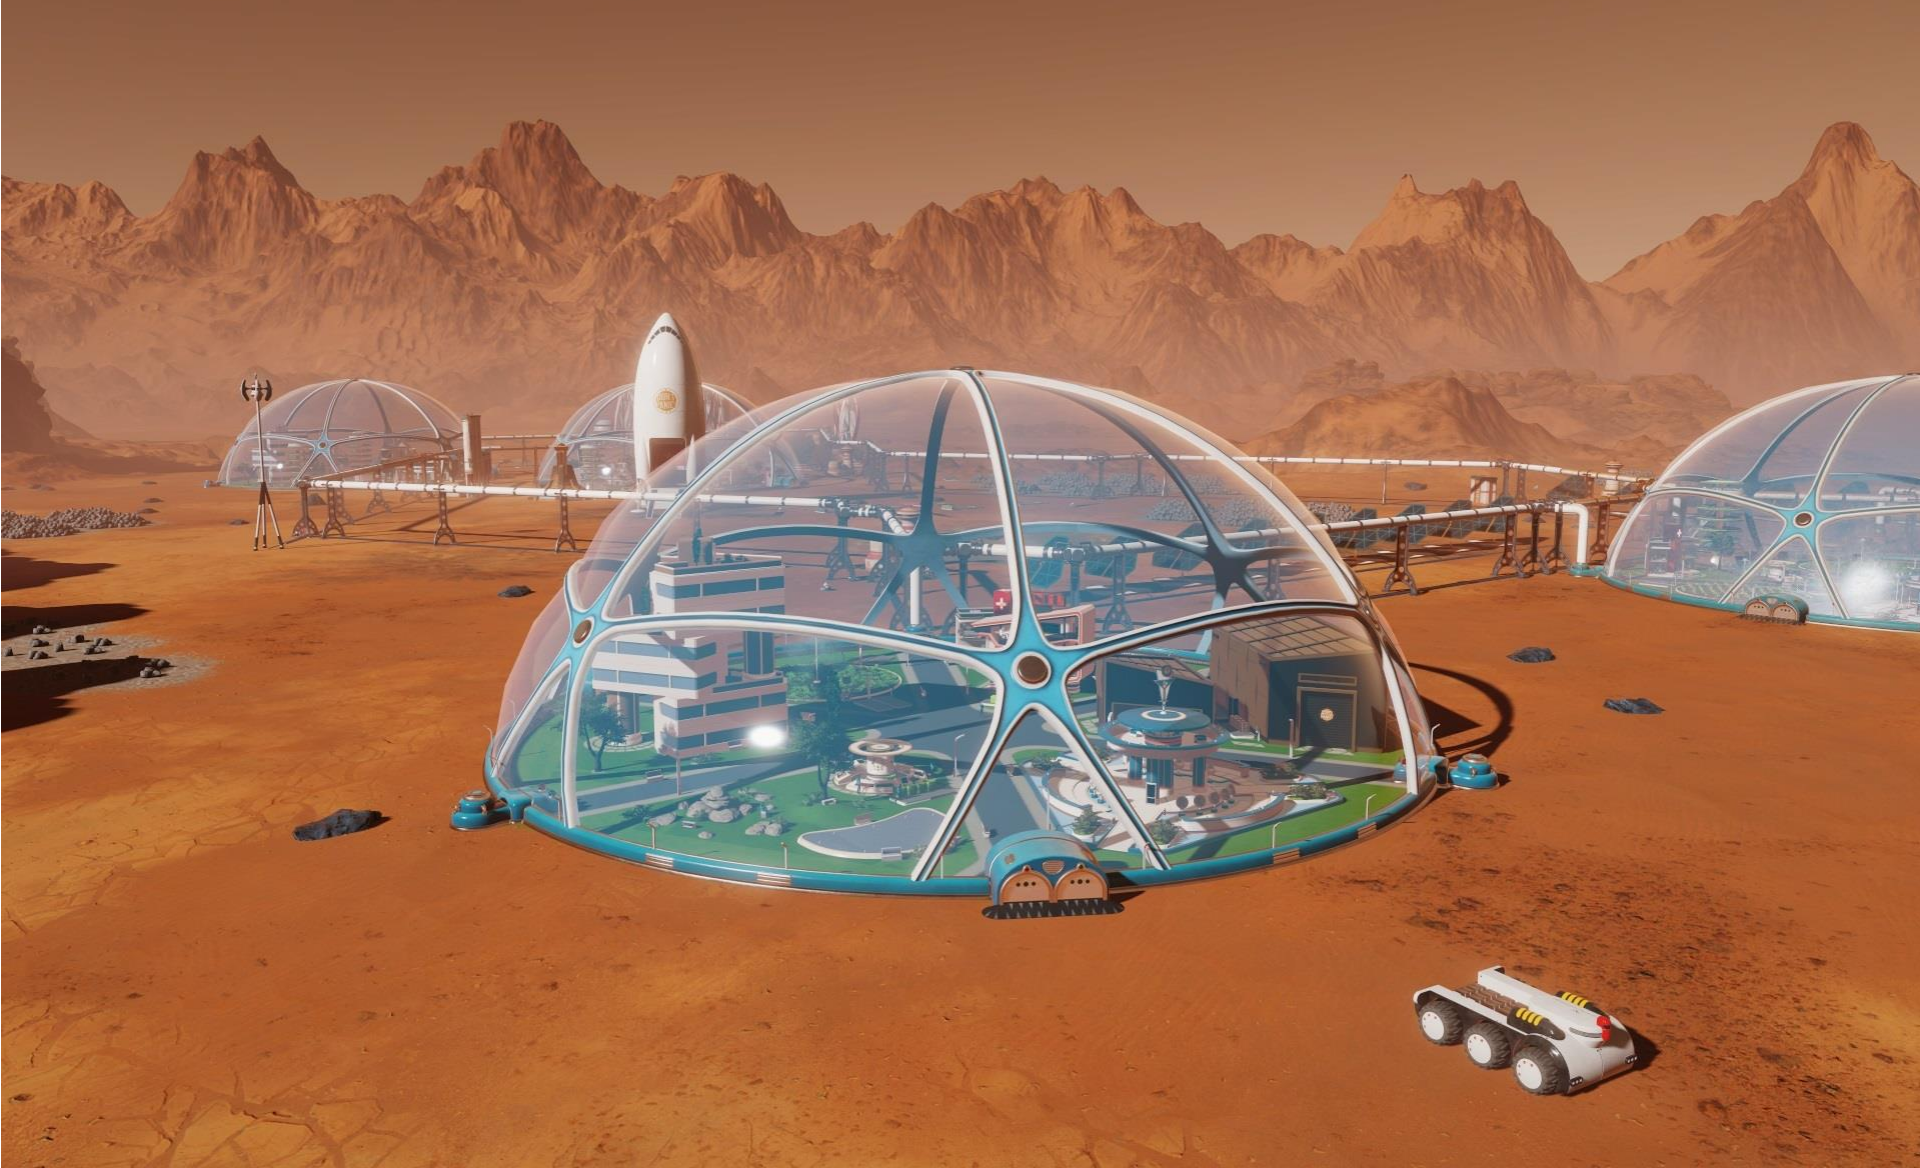

The Little Green Man from Mars types into his iPad answers to the questions I ask him.

**What does your
home look?**

**The answers appear on
the screen behind us...**

“Here in my domed city.”

**Show us a picture
of your ship.**

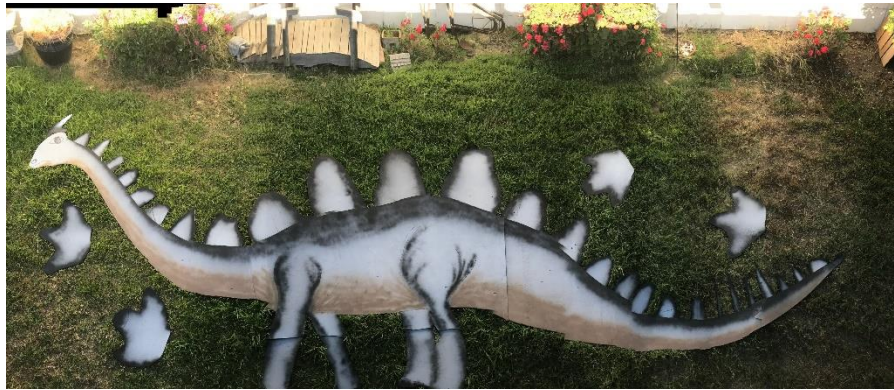

**It is a fun tour of the
Martian landscape...**

“This is my space ship.”

10. Activity

30 ft Apatosaurus & 24 ft Kronosaurus Floor Puzzles

Kronosaurus Teeth Models

AUXILIARY
65
PERSONS MAX

Make a joyful noise
to the LORD
Psalm 100:1

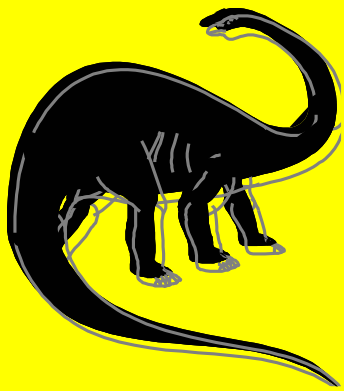

24 ft Kronosaurus Floor Puzzle.

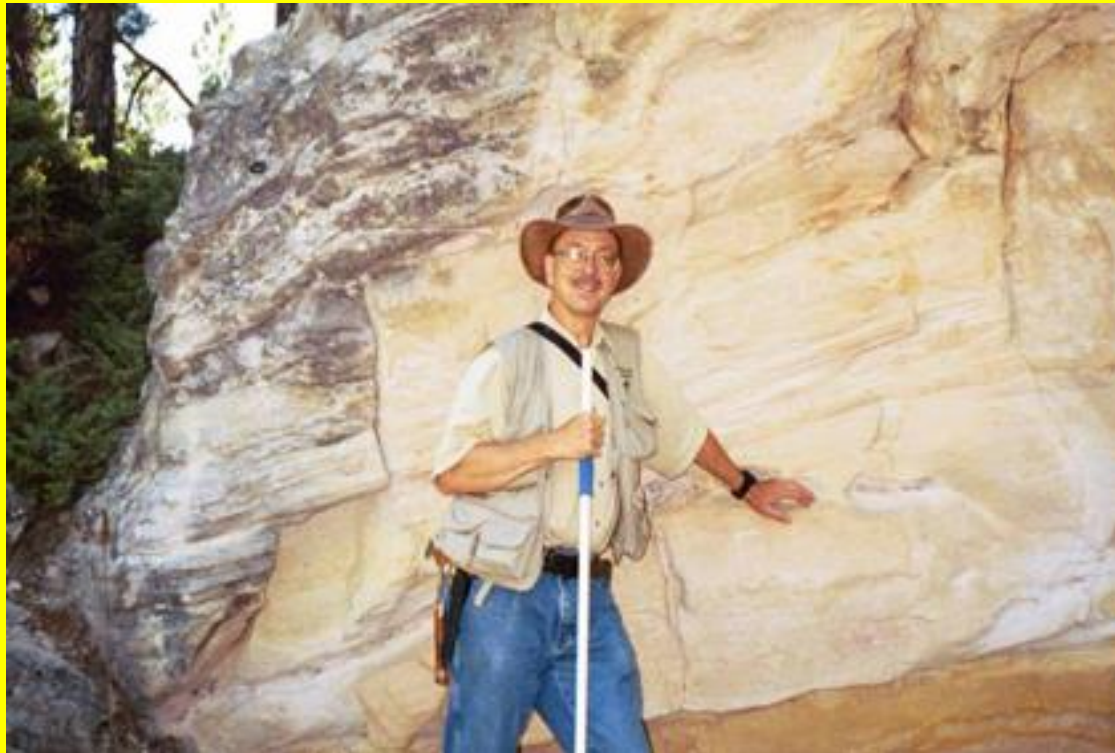

Way cool!

Make a
joyful noise

PERSONS MAX.
