## *Primordial Soup - Whats the Recipe?*

**Tuesday, October 19, 1999, 7:30 p.m. Totino Fine Arts Center, Rm. 115, Northwestern College, Roseville**

**Dr. Ross Olson MD** - When Stanley Miller created a few amino acids, "the building blocks of life," by passing an electric spark through gasses thought to represent the atmosphere of primitive earth, popular opinion seemed to be that life would soon be crawling out of his test tubes. This is an important area because the evolutionists' omnipotent creative force, natural selection, has to have living things to select.

But nearly a half century later and despite great advances in technology, we have seen no breakthroughs. In fact, the task seems even farther out of reach, because the simplest living creatures turn out to be complex beyond our wildest speculations.

If amino acids are building blocks, proteins would be buildings, from sheds to skyscrapers, and living cells would be like cities. It is mathematically foolish to expect a small protein molecule to organize itself from component parts under the most ideal conditins, much less a cell. Don't even TRY to think about the complexity of the human brain -- you might blow a fuse in yours!

Millions of monkeys on typewriters, it turns out, will not write the works of Shakespeare, or even a short homework assignment, no matter what you feed them. Don't try this at home, kids!

**Nov. 16 - Russ McGlenn, Living Dinosaurs. Are there Dinosaurs living today? What is the evidence?**

### Memberships

Memberships are for the calendar year. Check the letter and number following your name to see if you are paid up. An 'M' followed by 99 means you are paid through 1999. An 'R' or 'S' means you receive a free mailing and you need to renew your request or become a member. Your membership payment now will be good through next year. We have had some dynamite meetings and this month is no

### TCCSA's STATEMENT OF BELIEF

We believe in God: The Father, Son and Holy Spirit. We believe that the Bible is the inspired Word of God, and that all of its assertions are historically and scientifically true in the original autographs; this means that the account of origins in Genesis is a factual presentation of actual historical truths.

We believe that the origin of matter and all basic types of living things, including man, came about through direct creative acts of God during the six-day creation week described in Genesis. Whatever biological changes have occurred since the creation week have accomplished only changes within the created kinds.

We believe that the great flood described in Genesis, commonly referred to as the Noachian Flood, was an historic event, world-wide in extent and effect.

We accept the account of the special creation of Adam and Eve as the first man and woman. Their subsequent fall into sin, by disobedience of God's direct command, is the basis for our belief in the necessity of a Savior for all mankind.

Therefore, we believe that Jesus Christ is our Lord and only Savior and that personal faith in Him is necessary for salvation.

# Adventure Safaris

Schools have started for another year and we are busy arranging our schedules to meet the needs of homeschool co-ops and groups. There are openings available yet so please contact us right away to enroll your students or get information. We have an exciting year of scientific study planned, that will enhance the knowledge and improve the understanding of each student.

Contact us for information on local safaris planned for this fall including fossil digs and evening astronomy activities. We also provide customized presentations for churches, schools and other groups.

Just a reminder regarding the Science Fair in February at Har Mar Mall. You may want to start planning your project now to assure completion on time. This is a wonderful opportunity to interact with other homeschool families and be a witness in the community that the Bible and science are compatible.
