Vol. 35, No. 2

Alzheimer's Disease

7:30 PM, February 17, 2008, Totino Fine Arts Center, F2128 (Old Room 116), Northwestern College

The human brain is a 100 billion-circuit computer designed far beyond the comprehension of our brain. Some nerves actually "listen to" 100 other nerves. And, we need every one of them. The perfect organization and coordinated control of such a vast array of "talking cells" cries out for a Perfect Designer.

Alzheimer's Disease (AD) results from the chemical disturbance of these nerves. Normal thinking and body functions degenerate until they completely fail; there is still no cure. You have a one-in-ten chance of getting AD when you reach age 65. By age 85, your chances are 50%!

What are the possible causes of AD? Can you reduce your chances of getting it? Can you slow up the disease? You will see photographs of the internal brain—both normal and AD. Web-links for local and national support agencies will be listed.

Dr. Bruce Simat has a Masters and PhD from the University of Minnesota in Biochemistry and Physiology. He worked for the US Government Research Center at the VA Hospital in Minneapolis and then for Abbott Laboratories in Chicago. He has done research for Kallestad Laboratories and Sanfoni Diagnostics Pasteur before accepting the position of Associate Professor of Biology at NWC.

All meetings are free and open to the public, an offering will be accepted.

Have you considered ...

...the northern lights or aurora borealis. These shimmering bands of waving curtains of greens and reds periodically appear in the dark northern evening sky. This beauty is just a reminder of God's protection. You see, an aurora is radiation made visible. It all begins on the sun's surface where protons and electrons are boiled off the sun's surface. These dangerous high speed particles race through space reaching earth in a matter of hours. Instead of hitting earth directly, the earth's magnetic field sweeps the particles into the polar regions. This radiation hits the upper atmosphere causing the air to glow with energy. Without this magnetic field, we would not survive! God placed this special field around us to protect us from these dangerous incoming particles. The auroras just remind us of God's protection. So the next time, you see these shimmering bands of green and red...

...stop and consider God's wonders. Job 37:14

Astronomy and the Bible by Donald DeYoung (p. 54-55)

P.S. Scientists find a correlation of sun spots and auroras. The greater the number of sun spots the greater number of auroras. Sun spot activity runs on an 11-year cycle. The next best time to observe many auroras will be in 2012.

Julie Von Vett is available to speak (651) 464-4361

Science Fair 2009

Science Fair 2009 is coming February 14 & 15 to Har Mar Mall in Roseville. Students present their projects from a Christian perspective to mall visitors. Judging is done on Saturday morning. If you have a K-12 student, plan to participate this year. Go to www.tccsa.tc for information and rules, but do it right away.

Coming Up . . .

March 17—Joe Taylor—Fossil Facts and Fantasies
April 21—Julie Von Vett—God's Design in Weather
May 19—Russ McGlenn—TBD
June 16—Brian Young – Pre-flood World
For updates go to www.tccsa.tc

Grand Canyon Debate

May 13, 7pm at Northwestern College. Dr. Steve Austin, Geologist, Author and Teacher vs. Steve Johnson, Naturalist and Teacher from the Twin Cities. Tickets are \$10 per person to help defray the considerable costs involved.

Twin Cities Creation Science Association
 6300 Georgia Ave. N.
 Brooklyn Park, MN 55428-2526

CREATIONWISE

TCCSA's STATEMENT OF BELIEF
 We believe in God: The Father, Son and Holy Spirit. We believe that the Bible is the inspired Word of God, and that all of its assertions are historically and scientifically true in the original autographs; this means that the account of origins in Genesis is a factual presentation of actual historical truths.
 We believe that the origin of matter and all basic types of living things, including man, came about through direct creative acts of God during the six-day creation week described in Genesis. Whatever biological changes have occurred since the creation week have accomplished only changes within the created kinds.
 We believe that the great flood described in Genesis, commonly referred to as the Noachian Flood, was an historic event, world-wide in extent and effect.
 We accept the account of the special creation of Adam and Eve as the first man and woman. Their subsequent fall into sin, by disobedience of God's direct command, is the basis for our belief in the necessity of a Savior for all mankind.
 Therefore, we believe that Jesus Christ is our Lord and only Savior and that personal faith in Him is necessary for salvation.

Help Is Just a Click Away
 Do you search for things on the internet? Have you tried www.goodsearch.com? Goodsearch works like other search engines but with a difference. For each search you do they make a small donation to the non-profit of your choice.
 Please consider TCCSA as your non-profit of choice. Information on us and how much we have earned is available on the site if you are interested. You can make them your home page if you like.

I want to become a member of TCCSA and I subscribe to the Statement of Belief. (Calendar year membership dues are \$20.00. Students do not pay dues.) E-Mail: david-johnson@usfamily.net

I want to renew my membership in TCCSA (note dues above). Mail: TCCSA

Please keep me on your mailing list and/or e-mail updates 6300 Georgia Ave. N.

I want to make a donation to help promote Creation Science. Brooklyn Park, MN 55428-2526
