

## Fossil Facts and Fantasies

7:30 PM, March 17, 2008, Nazareth Hall Chapel, Northwestern College

Joe Taylor is a one-of-a-kind kind of guy starting as a farm kid in West Texas. He has a degree in Advertising Design and Illustration using his talent designing everything from type fonts, book and album covers to billboards. He also played with several bands in churches and Christian coffee houses from coast to coast. Joe learned to dig and preserve fossils on a ranch near his hometown of Crosbyton, TX.

In 1976 Joe heard Dr. Duane Gish in a debate with an evolutionist and it changed his artistic focus. Creationists had the right message but didn't have the fossils to back them up. In the early 1980's he worked at the La Brea Tar Pits restoring fossils. His skill convinced rabid atheists to help him become a paleontologist without going back to school. His ability to restore, sculpt and mold opened many basement collections in major institutions and private collections. It also gave him real knowledge about fossils and their living counterparts.

In addition to his own museum in Crosbyton, he has helped AiG with their new museum and taught others some of his skills. Joe has authored several books and is working on more. We think the whole family will find Joe Taylor unforgettable and you will be sorry if you miss him. Visit Joe's website [www.mtblanco.com](http://www.mtblanco.com)

All meetings are free and open to the public, an offering will be accepted.

### Have you considered ...

...We could not breathe without the moon! Day in and day out earth's silent moon causes the ocean tides. The moon's gravity pulls upon the water as it orbits the earth resulting in the water bulging, and we experience high tides. While some parts of the earth are experiencing high tides, the other parts have low tides. As the earth rotates, the moon causes two high tides and two low tides every 24 hours. When these high tides wash up on shore, they drag back into the ocean anything in its path, including impurities. These impurities are then eaten by microbes deep within the oceans. The high tides are actually cleaning our shorelines! What if there was no moon? Our oceans would not have tides resulting in stagnant and stinking oceans. Sea life would die, ocean plant life would also die. Much of Earth's oxygen comes from plants in the ocean. If sea plants died, we would not have sufficient oxygen for life. Our very breath is dependent on lunar tides!

...stop and consider God's wonders. Job 37:14

Our Creator has given us an unusually large moon with enough gravity to pull on the ocean waters. He provides everything we need! Count your blessings.

Julie Von Vett is available to speak (651) 464-4361

### Science Fair is over, Writing Contest coming.

Did you check out the science fair this year. The kids did a great job and it attracted a lot of attention from mall walkers.

All students are invited to participate in our writing contest again this year. We always get several papers of exceptional merit. The best are invited to read their paper at one of our meetings. Visit [www.tccsa.tc](http://www.tccsa.tc) for contest information and ideas.

### Coming Up . . .

April 21—Julie Von Vett—God's Design in Weather

May 19—Russ McGlenn—TBD

June 16—Brian Young – Pre-flood World

For updates go to [www.tccsa.tc](http://www.tccsa.tc)

### Grand Canyon Debate

**May 13, 7pm at Northwestern College. Dr. Steve Austin, Geologist, Author and Teacher vs. Steve Johnson, Naturalist and Teacher from the Twin Cities. Tickets are \$10 per person to help defray the considerable costs involved.**

Twin Cities Creation Science Association  
 6300 Georgia Ave. N.  
 Brooklyn Park, MN 55428-2526

**TCCSA's STATEMENT OF BELIEF**  
 We believe in God: The Father, Son and Holy Spirit. We believe that the Bible is the inspired Word of God, and that all of its assertions are historically and scientifically true in the original autographs; this means that the account of origins in Genesis is a factual presentation of actual historical truths.  
 We believe that the origin of matter and all basic types of living things, including man, came about through direct creative acts of God during the six-day creation week described in Genesis. Whatever biological changes have occurred since the creation week have accomplished only changes within the created kinds.  
 We believe that the great flood described in Genesis, commonly referred to as the Noachian Flood, was an historic event, world-wide in extent and effect.  
 We accept the account of the special creation of Adam and Eve as the first man and woman. Their subsequent fall into sin, by disobedience of God's direct command, is the basis for our belief in the necessity of a Savior for all mankind.  
 Therefore, we believe that Jesus Christ is our Lord and only Savior and that personal faith in Him is necessary for salvation.

**Help Is Just a Click Away**  
 Do you search for things on the internet? Have you tried [www.goodsearch.com](http://www.goodsearch.com)? Goodsearch works like other search engines but with a difference. For each search you do they make a small donation to the non-profit of your choice.  
 Please consider TCCSA as your non-profit of choice. Information on us and how much we have earned is available on the site if you are interested. You can make them your home page if you like.

I want to become a member of TCCSA and I subscribe to the Statement of Belief. (Calendar year membership dues are \$20.00. Students do not pay dues.) E-Mail: david-johnson@usfamily.net

I want to renew my membership in TCCSA (note dues above.) Mail: TCCSA

Please keep me on your mailing list  and/or e-mail updates 6300 Georgia Ave. N.
