Vol. 38, No. 7

## "Metamorphosis"

### A Video By Illustra Media

7:30 PM, July 17, 2012, Totino Fine Arts Center, Room F2128 , Northwestern College, Roseville

Throughout history, butterflies have fascinated artists and philosophers, scientists and schoolchildren with their profound mystery and beauty. In *Metamorphosis* you will explore their remarkable world as few ever have before.

Spectacular photography, computer animation and magnetic resonance imaging open once hidden doors to every stage of a butterfly's life-cycle. From an egg the size of a pinhead to a magnificent flying insect. It is a transformation so incredible biologists have called it "butterfly magic."

The butterfly's superbly engineered body is magnified hundreds of times to reveal compound eyes made of thousands of individual lenses, wings covered with microscopic solar panels, and navigational systems that unerringly guide Monarch butterflies on their annual migration from Canada to Mexico.

How did these extraordinary creatures come into being? Are they the products of a blind, undirected process? Or were they designed by an intelligent cause?

Filmed in North, Central, and South America, *Metamorphosis* is an unforgettable documentary filled with the joys of discovery and wonder.

All Meetings are free and open to the public, an offering will be accepted.

Have you considered...

...what happens after the forest fires burned out West. This summer we have heard of the raging forest fires in Colorado. After the fire, the vegetation has been devastated often in mountainous area with many ravines. With no grass and trees to hold the soil together, the next rainfalls could easily wash the soil away. However after the fires, the soils are no longer allowing water to enter the soil. The burning fires have released resins and waxes which cause the soils to become impervious to water. The rain water just washes over the soil. Did evolution create this? Did the soils get together and say we need to protect ourselves after a fire. Hardly, the God of the universe knew fires would take place and He could foresee soils being easily washed away. God in His wisdom set this plan into action.

...stop and consider God's wonders. Job 37:14

We are considering the purchase of listening devices for people with hearing loss. Please let us know if you have trouble hearing the programs so we can get an idea of how many receivers are needed. That will help us determine what a system will cost. Thanks

#### Coming Up ...

August—No meeting or newsletter

Sept. 18—Russ McGlenn presents Charles Babbage

Oct. 16—Nuttings, God Thought Of It First: Bio-Inspiration

#### TCCSA's STATEMENT OF BELIEF

We believe in God: The Father, Son and Holy Spirit. We believe that the Bible is the inspired Word of God, and that all of its assertions are historically and scientifically true in the original autographs; this means that the account of origins in Genesis is a factual presentation of actual historical truths.

We believe that the origin of matter and all basic types of living things, including man, came about through direct creative acts of God during the six-day creation week described in Genesis. Whatever biological changes have occurred since the creation week have accomplished only changes within the created kinds.

We believe that the great flood described in Genesis, commonly referred to as the Noachian Flood, was an historic event, world-wide in extent and effect.

We accept the account of the special creation of Adam and Eve as the first man and woman. Their subsequent fall into sin, by disobedience of God's direct command, is the basis for our belief in the necessity of a Savior for all mankind.

Therefore, we believe that Jesus Christ is our Lord and only Savior and that personal faith in Him is necessary for salvation.

#### Moving?

Let us know so you won't miss out! The Post Office returns these newsletters so we can update your address. They charge us postage for each returned piece. Help us save by letting us know. Thanks
