The Truth of the Global Flood: An Examination of the Geological Data

Tuesday August 17, 2021, 7:30 PM, 3003 N. Snelling, Roseville, Totino Fine Arts Center F2106 Carousel

In this presentation, Dr. Timothy Clarey from ICR, shows how sedimentary evidence across several continents confirms the occurrence of a global flood. He presents oil industry data compiled into maps and diagrams that illustrate the progression of the Flood and match the biblical narrative. He provides biblically based scientific explanations for large-scale sedimentary deposits that were rapidly formed by catastrophic activity. This abundant evidence supports a worldwide flood that happened just thousands of years ago. Dr. Clarey will be presenting this via ZOOM to our meeting at Northwestern because his schedule prohibits his coming in person. We can attend in person or via ZOOM if desired. The link will be provided to those on our email list or you can request it from david-johnson@usfamily.net.

Updates at www.tccsa.tc

All meetings free and open to the public.

Have you considered...

...the oldest known living trees? A bristlecone pine named "Old Methuselah" is about 4,723 years old. The 2nd oldest tree a Patagonian Cypress is 3,631 years. In California's Sequoia National Park, "General Sherman" has been dated at 2,150 years old. While, fallen and cut sequoias show ages exceeding 3,000 years. Notice the ages of the trees – roughly 2,000 to 4,700 years old. The world-wide flood in Genesis 6-8 was about 4,500 years ago.

What is the oldest petrified tree? At Florissant Fossil Beds in Colorado, the oldest petrified sequoia was close to 1,500 years old when it died. Yellowstone Park's "fossil forests" date about 1,000 years old at the time of their burial. This is far from mature specimens at the time of their demise. Fossil Trees in England, in the Arctic and Antarctic show a maximum age of 1,000 years. Scientists have never found a petrified tree older than 1,500 years old. The pre-flood world lasted about 1,656 years. Something killed the trees before they matured. The Flood of Noah's day killed and caused them to be petrified. Petrified trees, with their dates no greater than 1,500 years, give testimony to the biblical pre-flood world lasting about 1500 years.

It's been great to see friends again at our meetings. We plan to continue to use ZOOM for both speakers and attendees who are unable to travel due to distance or convenience issues. ZOOM is allowing us to get speakers from anywhere in the world and people outside of our area can also participate. Our speaker this month will be virtual but as travel restrictions are reduced we expect more will be in person.

Coming Up (Lord Willing)

Sept. 21—Russ McGlenn, Myth and Mystery of the MN Glaciers

Oct. 19—Dave & Mary Jo Nutting, Virtual Creation Tour Yellowstone

Nov. 16—Bruce Malone, TBD

December—No meeting, Celebrate Our Creator

TCCSA's STATEMENT OF BELIEF

We believe in God: The Father, Son and Holy Spirit. We believe that the Bible is the inspired Word of God, and that all of its assertions are historically and scientifically true in the original autographs; this means that the account of origins in Genesis is a factual presentation of actual historical truths. We believe that the origin of matter and all basic types of living things, including man, came about through direct creative acts of God during the six-day creation week described in Genesis. Whatever biological changes have occurred since the creation week have accomplished only changes within the created kinds. We believe that the great flood described in Genesis, commonly referred to as the Noachian Flood, was an historic event, world-wide in extent and effect. We accept the account of the special creation of Adam and Eve as the first man and woman. Their subsequent fall into sin, by disobedience of God's direct command, is the basis for our belief in the necessity of a Savior for all mankind. Therefore, we believe that Jesus Christ is our Lord and only Savior and that personal faith in Him is necessary for salvation.
