Vol. 49, No. 5

Supernatural Selection

Tuesday May 16, 2023, 7:30 PM, Univ. of Northwestern, Totino Fine Arts Center, Room F2106

Brian Young is returning to TCCSA with another talk that you will want to hear.

Most of us have heard of "natural selection" but very few have heard of "super" natural selection. This is the most recent and up-to-date information that destroys the very foundations of what we have been taught about evolution and takes even Creationists "outside of the box" of their previous thinking. Processes thought to take long periods of time are now being seen in just hours and the cause is clearly unnatural. This is a must see for every parent and child to help understand the world around us from a Biblical perspective and to discern the volumes of false information coming at us about evolution, not just in science class but in every subject.

We will also see and hear about a new Creation Museum in Nebraska and give another reason for a field trip to a state that has some amazing things to see.

Updates at www.tccsa.tc All meetings free and open to the public.

Have you considered...

...From the black plague burial pits of Europe, scientists have found what helped individuals to survive the Bubonic plague. The Black Death or Bubonic plague killed up to half the population of Europe during the mid-1300s. It seems that if a person had the mutated gene ERAP2, they were "40% likely to survive the plague". This mutated gene was passed on to future generations.

You may say, look a helpful mutation! But there is a downside, this plague-resisting gene is linked to auto-immune diseases such as Crohn's disease. Auto-immune diseases attack one's own body causing serious health problems. Evolution teaches that mutations were involved from one cell evolving into a person. Yet, science has found that 99% of mutations are NOT beneficial. Yes, those with this mutated gene survived the Black Death but now deal with auto-immune diseases. Who would have thought that the Black Death of 700 years ago is still affecting our health!

Black Death 700 years ago affects your health now. James Gallagher. October 20, 2022. Accessed 4/17/2023

TCCSA's STATEMENT OF BELIEF

We believe in God: The Father, Son and Holy Spirit. We believe that the Bible is the inspired Word of God, and that all of its assertions are historically and scientifically true in the original autographs; this means that the account of origins in Genesis is a factual presentation of actual historical truths. We believe that the origin of matter and all basic types of living things, including man, came about through direct creative acts of God during the six-day creation week described in Genesis. Whatever biological changes have occurred since the creation week have accomplished only changes within the created kinds. We believe that the great flood described in Genesis, commonly referred to as the Noachian Flood, was an historic event, world-wide in extent and effect. We accept the account of the special creation of Adam and Eve as the first man and woman. Their subsequent fall into sin, by disobedience of God's direct command, is the basis for our belief in the necessity of a Savior for all mankind. Therefore, we believe that Jesus Christ is our Lord and only Savior and that personal faith in Him is necessary for salvation.

A bit of TCCSA history

TCCSA was started in 1973 but we have almost no information from the first 3 years. The first document regarding meetings lists the Nov. 8, 1975 meeting with Dr. Donald Chittick of Newberg, OR presenting *Creation Model Workshop for Teachers*.

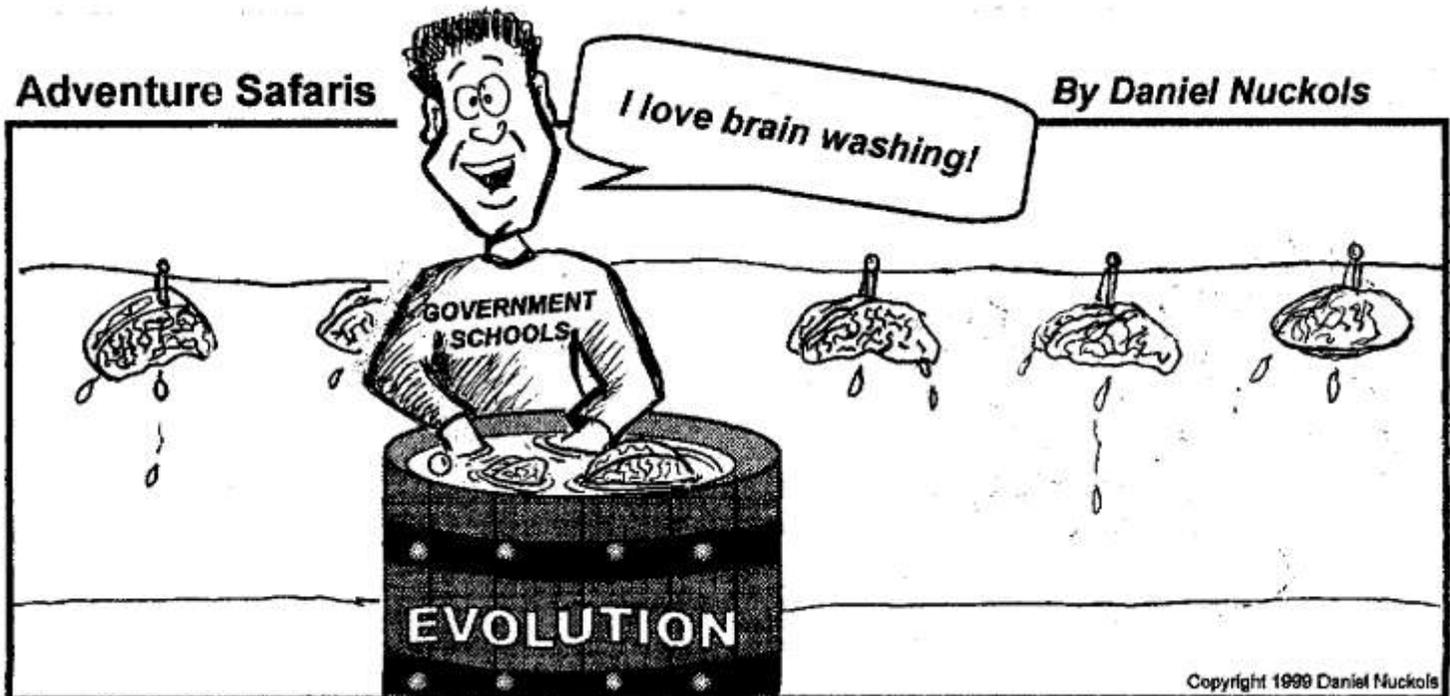

The second listing on Jan. 20, 1976 was a family night with the Moody Science Films *Living Waters* and *Red River of Life*. Those Moody films are still available with excellent information and very well done.

On Feb. 17, 1976 they had a Danish-pastry Dessert Fellowship with Rev. Walter Lang narrating the filmstrip on locating Noah's Ark.

Looks like they had a variety of programs with at least some located at Northwestern College but at the old campus. In 1977 they had a couple meetings at Viking Village with a meal.
