

Dino Bone Soft Tissue Lab and Sessions 2022

What happened to the dinosaurs?
Did they disappear millions of years ago?
Or was it possibly much more recent?

September 18th / Sunday

10:45am Dr. Armitage speaks @ Inspired Word Church Service:
"I Will Follow Him Into The Deep"

5:30pm Dr. Mark Armitage: **"The Soft Side of a Mean Dinosaur"**

Come and see dinosaur cells, veins, blood vessels and even nerves that DSTRI has collected and published in secular journals. Handle and examine the very dinosaur bones that have yielded these soft tissues and don't forget your free copies of Old Stretchy the Dinosaur Bone Cell books! Dr. Mark will be available to answer any questions you may have about the dinosaur digs, the soft tissue research, the hands-on labs, etc. Moreover, learn about the great MYSTERY of the many blood clots we observe within these bones.

Dinosaur bone

Decalcified into bone juice to examine under microscopes.

September 21st / Weds. and September 24th / Sat.

Homeschool students have a once-in-a-lifetime opportunity to observe & examine nerves, veins, blood clots, blood cells, bone cells, etc. from real dino bone under the instruction of Dr. Mark Armitage using 2 kinds of professional microscopes! For ages 10-24 yrs.

(Sept. 18 @ 1:00pm - for registered Lab Students & Parents Mandatory Session)

Limited Lab Space - Register now for one of the days!

9:00-12:00pm Dino Lab for 20 students

12:00-3:00pm Dino Lab for 20 students

3:30-6:30pm Dino Lab for 20 students

INSTRUCTOR: Dr. Mark Armitage, world-renown microscopist, & discoverer of many different dinosaur soft tissues. His published work reveals dinosaur soft tissue with nerves, veins, blood clots, blood cells, & bone cells. This proves that dinosaurs are thousands not millions of years old! Coming 2,000 miles, so your students can see & discover these for themselves!

LOCATION: Inspired Word Church • 12825 Tucker Road Rogers
