

Dino Bone Soft Tissue Discovery Talks

What happened to the dinosaurs?
Did they disappear millions of years ago?
Or was it possibly much more recent?

SPEAKER: Dr. Mark Armitage, world-renown microscopist, & discoverer of many different dinosaur soft tissues. His published work reveals dinosaur soft tissue with nerves, veins, blood clots, blood cells, & bone cells. This proves that dinosaurs are thousands not millions of years old!

September 18th / Sunday

LOCATION: Inspired Word Church • 12825 Tucker Road, Rogers MN

10:45am “I Will Follow Him Into The Deep”

Dr. Mark Armitage speaks during the Inspired Word Church Service

5:30pm “The Soft Side of a Mean Dinosaur”

Come and see dinosaur cells, veins, blood vessels and even nerves that DSTRI has collected and published in secular journals. Handle and examine the very dinosaur bones that have yielded these soft tissues and don't forget your free copies of Old Stretchy the Dinosaur Bone Cell books! Dr. Mark will be available to answer any questions you may have about the dinosaur digs, the soft tissue research, the hands-on labs, etc. Moreover, learn about the great MYSTERY of the many blood clots we observe within these bones.

September 20th / Tuesday

LOCATION: Northwestern University • Roseville, MN • Totino Grace Building - LOOK FOR SIGNS!

7:30-9:00pm

Dr. Mark Armitage speaks @ Twin City Creation Science Association (TCCSA)

“The Soft Side of a Mean Dinosaur”
