Recent Studies in Creation Science – A Popular View

Dr. Kevin Anderson
Director, Van Andel
Creation Research Center

Tuesday, November 18, 2003, 7:30 pm
Northwestern College, 3003 North Snelling, Roseville
Nazareth Hall, Chapel

In This Talk For General Audiences, Dr. Anderson Will be Sharing Some of the Recent Advances in Creation Science, Including Such Topics as:

- **How Darwin developed his ideas**
- **What factors influenced his thinking**
- **How Darwin's thinking was popularized and subsequently modified to arrive at today's current ideas regarding evolution**
- **Information on stalactite formation**
- **Meteor astronomy and more**

Dr. Kevin Anderson received his Ph.D. in microbiology and was a professor of microbiology at Mississippi State University, and a research microbiologist for the USDA. He has published over 20 research papers in technical journals, and has given technical talks at numerous scientific conferences and is the editor-in-chief of the Creation Research Society Quarterly.

Also on Nov. 17, 7:30 PM "Recent Studies in Creation Science – Technical Issues". Details on our website.
