Dr. Bierle holds M.A. and Ph.D. degrees in the life sciences and an M.A. in New Testament Studies. An academic dean and college professor for nearly 25 years, he is skilled at communicating complex subjects in a clear, original, and fascinating way.

Evidence for the existence of God can be seen in the natural world and in history. Can these be persuasive to the professional community? Are they of any help to lead unbelievers to consider faith in Jesus Christ? The focus of this presentation is on a strategy for integrating these fingerprints of God in the service of evangelism.
