# "Whale Evolution: What Do The Bones Actually Show?"

University of Northwestern - St. Paul, 3003 North Snelling, Roseville, MN, Totino Fine Arts Center, Room F2128 (Old F116) [tccsa.tc](http://tccsa.tc)

The Whale Evolution talk will focus on the proposed timeline of whale evolution, the changes that have been made over the last few decades, and what the bones really show. Special whale adaptations will be used to show the complexity of these special water dwelling mammals and the improbability that they evolved from land mammals, but were instead created on the 5th day of creation.
