Dr. Curtis Writes: "I deal with the ages of people prior to the flood and at least five things that change at the flood that now makes it impossible to live that long. I show pictures of modern attempts in nearly every metro area to closely replicate the pre-flood conditions in hospitals. I understand that there are two such hyperbaric chambers in the Twin Cities. Four of the things that changed are estimates. 1 (the % of oxygen in the atmosphere) we can prove was between 32% & 35% before the flood.

"There are a lot of power point graphics & pictures to make it easy for elementary school children to understand most of what is presented. Some suggest that the years of Gen. 1-9 are really months. If that is true, you will have men begetting children at age 5 or 6. I know there is an ailment that brings about physical maturity about that age but who would be willing to say that all of these men suffered from it?

"I have studied the subject of Evolution & Creation since January of 1967 as a hobby. I have been presenting Seminars on the subject full time now for about 5 years.

"I have 2 advanced academic degrees: 1 in Psychology & 1 in Biblical Archaeology. My understanding of Creationism comes from personal research over 38 years."
