John Mackay is an international speaker and is the Australian Director of Creation Research ([www.creationresearch.net](http://www.creationresearch.net)). He has been lecturing on the subject of origins and doing field research worldwide for the last 30 years.

John takes us on a whirlwind tour of the geologic evidence against Darwin, evolution and long ages. Logical evaluation of the rocks leads to the conclusion that the Biblical history of Creation, Fall and the Flood is the most credible conclusion.

Hold on to your seats and don't try to take notes — it is fast, entertaining and highly useful material. You can preview it on his website. [www.creationresearch.net](http://www.creationresearch.net)
