"Programmed Filling: NOT Natural Selection"

Northwestern College

3003 North Snelling, Roseville Minnesota,

Nazareth Hall Chapel (Building nearest the lake)

For Details Directions & Maps visit www.tccsa.tc

We will learn about an important and liberating new way of looking at organisms and their environment: "Programmed Filling" - a Biblically consistent and scientifically superior paradigm that explains exactly what happens at the organism-environment interface. Three points of departure mark the old and new understanding: 1) natural selection exists only as a misleading mental construct; 2) usage that acknowledges it in any way greatly dishonors the Lord; 3) programmed filling - a God-ordained, organism-centered, purpose-driven mechanism - is reality. By recognizing the explanatory power of programmed filling, believers will actually have a communicable and scientifically accurate pushback to natural selection that is just as enlightening and easy to understand.
