Travelling Creation Museum:
“God’s Little Creation”

Ian Juby

Northwestern College

3003 North Snelling, Roseville Minnesota,
N2250 Nazareth Chapel (The Building Nearest The Lake)
For Details Directions & Maps visit www.tccsa.tc

Ian Juby is the founder of Canada's first Creation Museum, the traveling Creation Science Museum of Canada. He is also the founder and president of the International Creation Science SIG for Mensa members, and a member of Mensa himself. In 2007 he took on the presidency of Citizens for Origins Research and Education, in Ottawa, Ontario.

He has spent 18 years studying the origins debate, and has spoken on the subject for 12 years, including multiple appearances on national and international television. A methodical researcher, he has traveled extensively across North America to gain first-hand insight into the evidence pertaining to Creation and Evolution, with a strong interest in geology and geomorphology. Now in full-time Creation ministry, he spends much of his year devoted to sharing the Creation message and carrying on his first-hand research with experiments and field studies. He also consults for Creation Museums and builds museum displays, which can now be seen in seven museums across North America.

About his talk, he says this:

"I never do the same talk twice really, however, with the children's talk, it's pretty predictable where I'll go:

-Scientific laws (biogenesis, second law of thermodynamics - yup, I kid you not); frog prince, frog in a blender -what is science?

-both evolution and creation are outside of the realm of science, so how can we scientifically tell which one is correct?

- The scientific tool of Intelligent design which even children use -information -Noah's ark and the dinosaurs

I might also touch on:

-living fossils (can be a good 15 minute talk alone) -fast fossils -complexity of life (i.e., the ammonite) -dinosaurs and humans in modern times."

Sponsored by the Twin Cities Creation Science Association
Open To The Public — A Free Will Offering Is Taken
