University of Northwestern, St. Paul
3003 North Snelling, Roseville, MN
Totino Fine Arts Center, F2106 Carousel

Dr. Joseph Kezele, MD

“Valuable and Vicious Viruses”

Both evolutionary and biblical models of the origin of viruses are presented, followed by a brief survey of viral types and their interaction with human cells. Beneficial uses of viruses in medical treatment and a few selected viral diseases are discussed. This talk ends with some comments on the current Covid-19 situation and a novel approach to vaccination.

Dr. Kezele is a popular speaker on many topics and has presented talks to us for the past few years. We will be meeting in person but due to his busy schedule we will be meeting with him via ZOOM from Arizona this month.
