### Russ McGlenn

### Would You Like Neck or the Wing?

**Online Meeting on ZOOM**  
For a link, email Dave Johnson  
[david-johnson@usfamily.net](mailto:david-johnson@usfamily.net)

**Later go to Youtube.com**  
**Search for TCCSA**

Would you like the Neck or the Wing? In this program you get both. Russ McGlenn will be comparing the anatomy of the 40-foot-long neck of the Apatosaurus to the 7-foot-long neck of the giraffe. Russ will compare the wings and blood circulatory system of the pterodactyl to that of a bat. He will show similar structures and how they function in the biggest pterodactyl which had a 40-foot wingspan. You can see a full-size replica of this one at the Saint Paul Science Museum hanging from the ceiling. So, you get a choice of a 40-foot neck or a 20-foot wing. Or stay and be served both.

**Sponsored by the TCCSA, Free and Open To The Public [www.tccsa.tc](http://www.tccsa.tc)**
