"Mute Fossils Speak Volumes"

**University of Northwestern St Paul, 3003 Snelling
Ave. N. Roseville MN Totino Room F2106**

What do the fossils really say? Nothing. Dead things don't talk. However we as scientists try to talk for them based on our interpretation of the evidence. We will look at what was reported, what was actually found, the role of the artist in the fossil reconstructions, out-of-order fossils, soft tissue in fossils. All said, the fossils speak volumes against evolution and volumes for creation.
