"One of the best-produced documentaries ever made"
- Dr Ted Baehr, Movieguide

In 1831 a young amateur scientist, Charles Darwin, boarded HMS Beagle on an epic five-year voyage of discovery. His observations and later reflections resulted in a book that profoundly impacted the world.

2009 marked the 200th anniversary of Darwin's birth and the 150th anniversary of the publication of his 'Origin of Species'. The Voyage that Shook the World retraces Darwin's journey, exploring the places and discoveries crucial to the formulation of his Theory of Evolution.

Filmed in South America, the UK, North America, Australia and Europe, The Voyage features dramatic period recreations and stunning nature cinematography interwoven with scholars sharing their perspectives on the man and the controversy.

A fascinating and thought-provoking opportunity to gain new insight into
The Voyage that Shook the World.
