# THE INCOMPETENCE OF EVOLUTION

WITH DR. ROB STADLER

**Tuesday, March 17, 2026, at 7:00 pm**

Some kinds of evidence provide higher confidence than other kinds of evidence. The evidence that is most commonly used to support large-scale evolution (the fossil record and similarities among lifeforms) provides only a very low level of confidence. In contrast, experimental studies of evolution in controlled environments provide high confidence evidence. These experiments consistently show that evolution is a very constrained process, incapable of producing the diversity of life.
