

A Flood of Evidence!

Tuesday March 18, 2025, 7:00 PM, Univ. of Northwestern, Totino Room F2106

Noah's flood was a horrific event which left its mark on the landscape. If there was a worldwide flood, what would you find? Come and hear of the many evidences of this catastrophic event such as exquisite fossils, planation surfaces, inselbergs and more.

Julie Von Vett co-authored 3 books (see Below) with Bruce and she volunteered to fill in this month due to an emergency in Bruce Malone's family. Julie has a great talk about the evidence God provided to help us understand His Creation and some of the consequences of sin in that creation. Please keep Bruce and family in your prayers, he has been rescheduled for our May meeting.

Have you considered ...

There are approximately 200,000 different proteins which make up the majority of the structures within the human body. As far as we know every one of these proteins has some useful, functional purpose. Why are our bodies not full of useless leftover chemicals from our evolutionary past? These proteins vary from the crystal clear protein solution within our eyeballs to the enamel on our teeth. Starting out as a single cell (dividing and doubling in size approximately every 30 minutes) and forming increasingly complex structures, our bodies know how, where, when and how much of each of these proteins to form. Too much, and we die. To little, and we die. Tissue produced in the wrong location, and we die.

Most amazing is how each protein is produced. They are formed from coded information upon the DNA molecule. But to form each protein a little protein machine must attach to the DNA at just the right point to start the unzipping process. Next a third protein machine must line up a special molecule (RNA) of exactly the right length and a fourth protein must know when to stop the copying process. The RNA passes through a fifth protein machine which allows an exact copy of the information to be made.

Here is the trillion dollar conundrum. Biologically useful proteins NEVER exist in nature unless DNA makes them and DNA cannot be made without these proteins. So where did either one come from? Just like you can't have a chicken until you have an egg you can't have an egg without the chicken (chicken are formed with eggs already inside the female chicken). The obvious answer is that the entire system was created simultaneously—yet this is the one answer not allowed to be considered by students.

Before I formed thee in the belly I knew thee, and before thou camest forth out of the womb I sanctified thee...

-Jeremiah 1:5

TCCSA's STATEMENT OF BELIEF

We believe in God: The Father, Son and Holy Spirit. We believe that the Bible is the inspired Word of God, and that all of its assertions are historically and scientifically true in the original autographs; this means that the account of origins in Genesis is a factual presentation of actual historical truths. We believe that the origin of matter and all basic types of living things, including man, came about through direct creative acts of God during the six-day creation week described in Genesis. Whatever biological changes have occurred since the creation week have accomplished only changes within the created kinds. We believe that the great flood described in Genesis, commonly referred to as the Noachian Flood, was an historic event, world-wide in extent and effect. We accept the account of the special creation of Adam and Eve as the first man and woman. Their subsequent fall into sin, by disobedience of God's direct command, is the basis for our belief in the necessity of a Savior for all mankind. Therefore, we believe that Jesus Christ is our Lord and only Savior and that personal faith in Him is necessary for salvation.

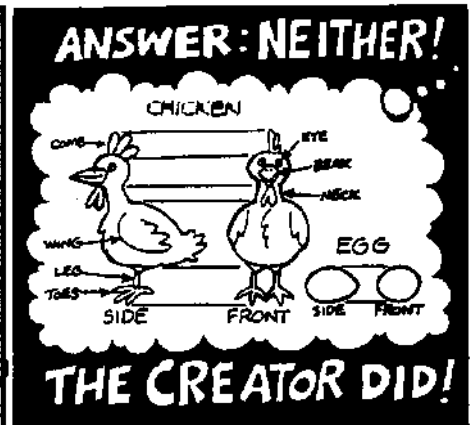

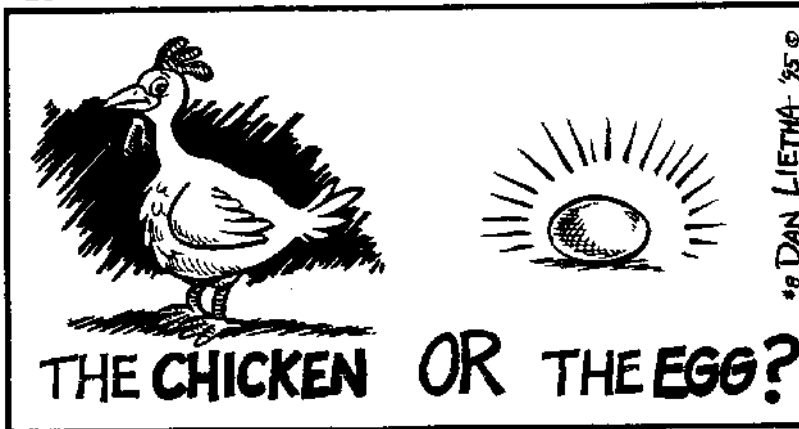

TCCSA Update

For those of you with internet access our new website is now online and available in an easy-to-use format. Most of those reading our paper newsletter won't have access so it won't make much of a difference to you. The vast majority of people who use TCCSA however will find it clean and easy-to-use and a valuable resource. The internet is an inexpensive way to reach the world with the message of our Creator and His creation.

Everyone knows about radio and TV and the difference it makes to see as well as hear things. If you attend our meetings you see and hear what's happening. With the internet what you see and hear a program similar to watching TV but on your schedule plus you can stop and start, change the speed and re-watch as much as you want. In addition if a speaker puts a link to another internet site the watcher can click and be taken to that site.

Our site has links to our resources plus links to other places with similar programs by other organizations like ours. All this is available 24-7 to anyone with an internet connection anywhere in the world. The internet can be used by the Devil for evil but also by God for good.
