This presentation shows that our mouths and throats are built with a unique ability for large variations in types of sound produced. We will show how all the sounds we make are made. Unlike chimps, our tongues are very versatile and our oral cavity is built for speech, not just for singing! Did you know each voice is unique? It is so supreme such that even the wind and the waves must obey it.

A man with short dark hair and glasses, wearing a light blue t-shirt and a black backpack, is seen from behind, looking out over a vast, deep canyon. The canyon walls are reddish-brown and layered, with a river visible in the distance. The sky is blue with scattered white clouds. The backpack has a small black label with the word "BURTON" in white capital letters.

CREATION BASICS & BEYOND

Written by 10 Scientists at the Institute for Creation Research

Can You Be a Point Person?

Many Christians shy away from the issue of creation vs. evolution. Why? Because they think creation is either not important, not credible, or divisive.

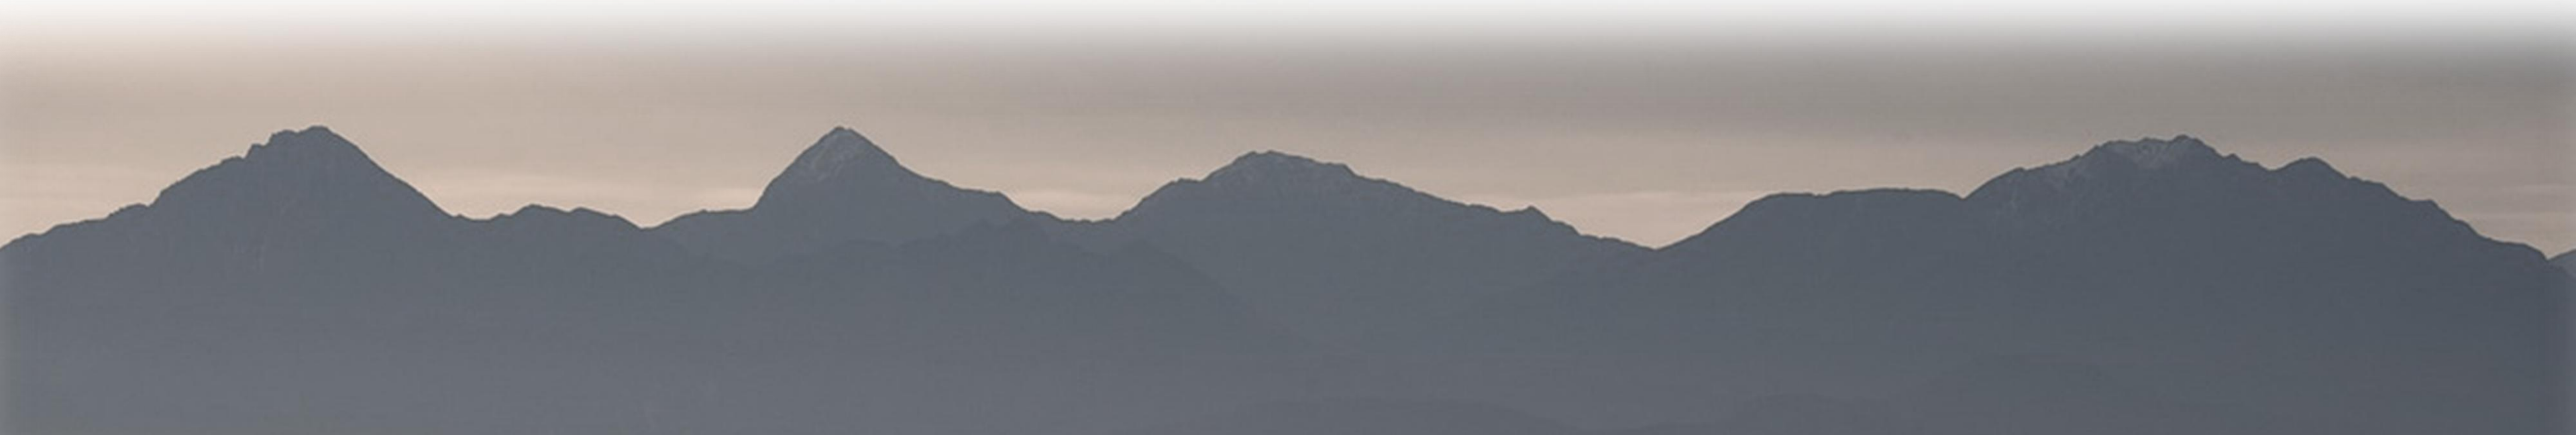

Is It Important?

Regular TCCSA attenders know that creation is actually far more credible than evolution and is more important to the gospel than most realize.

Why Is It Important?

Believing that God used evolution or took millions of years makes Him either clumsy, cruel, or indifferent and makes the Bible unreliable from the beginning.

What Is Involved?

But the issue is also not one of pure intellectual discussion. There are psychological and spiritual barriers to even considering the evidence. To be a point person requires humility, prayer, love, and persistence.
